Celebrating Your Silver Anniversary

Welcome to Roger and Barb's 25th wedding anniversary celebration! The 25th anniversary is known as the Silver Anniversary – a classic metal that suits this classy couple perfectly. Silver has many fabulous properties, as do Roger and Barb.

- Just like silver can be polished, Roger and Barb shine brightly when they are working together or talking about their children.
- Just like silver is a fantastic conductor of heat and electricity, they both know how to keep the sparks flying! *[Do an exaggerated wink here!]*
- Just like silver has reflective properties, Barb and Rog reflect each other's strengths and build up each other's weaknesses.
- Just like silver, Roger and Barbara are strong yet flexible when needed.
- Silver is valuable, and we all value the love and friendship Roger and Barb have offered us through the years.
- And just like silver often looks gray. . . both of them seem to have a few more gray hairs than they did on that special day 25 years ago!

Today, we're celebrating the Smith's Silver Anniversary. So let's raise our glasses in their honor. To Roger and Barb! Cheers!
