

Multiplication and Division KenKen Puzzles

Directions: Solve the multiplication and division problems in each colored section, or cage, then enter the correct numbers in the blank squares. The number in the top left of each cage is the sum and the math sign tells you what operation to use.

- Rules:**
- Each row must contain three different numbers.
 - Each column must contain three different numbers.
 - All of the numbers in a cage must create the given sum using the given operation.
 - Cages with no math sign are free spaces where you simply write in the provided number.

Puzzle 1

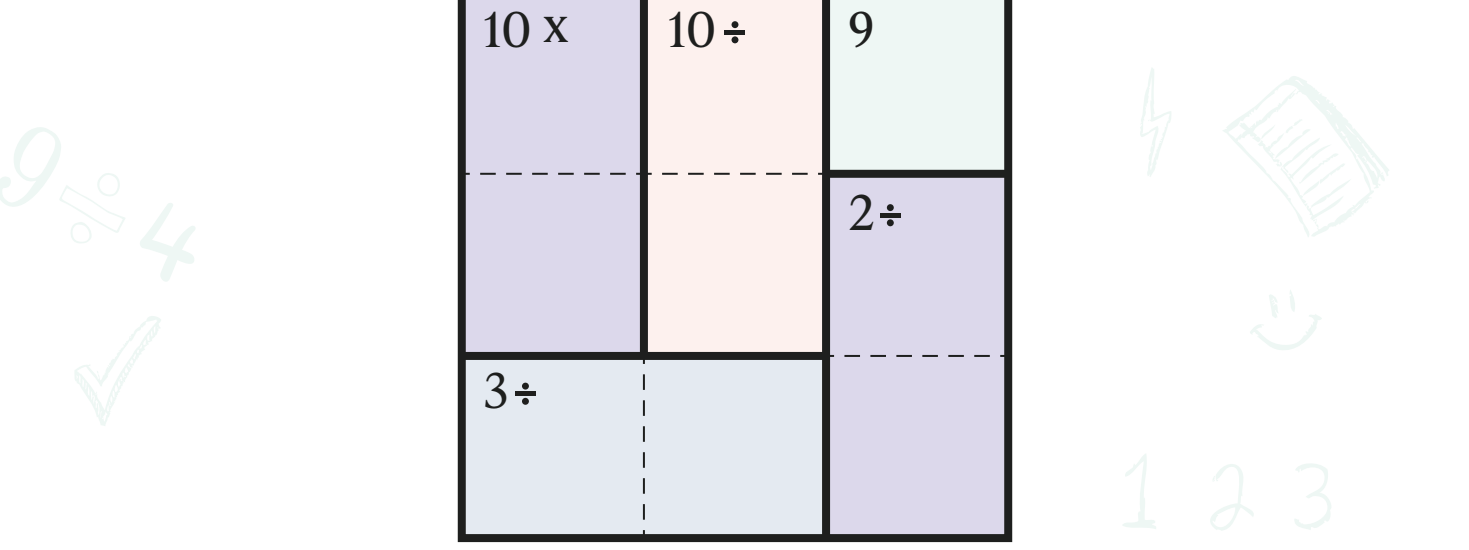

Directions: Use only the numbers 1-10 to complete the puzzle. Each number can only be used once.
